

# **Amcross Support to Country Level MI Activities, 2009**

**Global Measles Management Meeting  
Geneva, October 2009**

**American  
Red Cross**

# Central Level Support

- One full time CDC staff member seconded to Amcross National HQ in support of the global initiative

# Regional Support

- One full time measles delegate assigned to Nairobi, providing technical support to Kenya and neighboring countries in planning and implementation of measles SIAs

# SIAs supported in 2009

- Uganda integrated measles SIA, \$245,000
- Rwanda integrated measles SIA, \$97,300
- Kenya integrated measles SIA, \$450,000

# Main interventions in SIAs

- Use of Red Cross volunteers, mobilized by national societies, to do social mobilization. This is sometimes done by house to house visits, sometimes by village meetings
- Support to airing of radio spots
- As needed, logistics to support to reduce gaps in support

# Impact evaluation

- All three reports for 2009 are pending!
- Preliminary data from Kenya show about a 15 percent difference in admin coverage between KRCS and non-KRCS districts.
- This result needs treating with caution. There are particularities in the Kenyan campaign which prevent drawing any conclusions about generalizability.
